

**Switchpack: DSP4-R (EN)****6.04.2022**

The DSP4-R is a DMX512 controlled 2 channel relay switch pack for direct DIN-Rail mounting in electrical installation cupboards with 4 volt free SPST switches for 250V~ and 16A/70A rated/inrush currents.

The DSP4-R is the DSP4TR without the feature of reduction of momentary high inrush currents.

There are two on/off switching hysteresis available.

All modes are adjustable via the three rotary code switches and the 4times DIP switch.

A very special of the DSP4-R is the 4 channel power on sequencer with delays from 1 to 99s, which is expandable by using further DSP4-R up to 32 channels.

**Summary of features:**

1. 4x 16A/250V~ (4000VA, AC1) contacts
2. decimal DMX512 address adjustment
3. two on/off switching hysteresis 60/40% or 3/2%
4. Separate manual override of the 4 channels
5. DIN-Rail Mounting
6. all external connections via elevator terminals up to 2,5<sup>2</sup>mm
7. Dimensions (L x B x H): 160 x 90 x 58
8. Weight: 354g
